

Make sure in the page scaling section that page scaling is set to none prior to printing. DO NOT shrink to printable area. It is located in the middle left portion of the print menu window under the "Page Handling" section. You can get to the print menu by selecting the print icon or by going to the file menu in the far upper left corner of the window and selecting print.

To NOT print this comment, in the same print menu window, make sure that only "Document" is selected in the drop down box under the "Comments and Forms" section in the upper right corner above the preview window.

Check to make sure it fits gauge cage bolt pattern.
